

Protect Your Low Voltage Wiring

Sprinkler - Computer - Television - Telephone wires.

Protect any low voltage wiring from service interruptions with the **Exterior Utility Guard**.

The new **Exterior Utility Guard** provides protection for low voltage exterior utility lines at the strike zone. This is the vulnerable point at which utility wires come from the underground to the building. It simply slips over the existing conduit or wires to prevent damage caused by trimmers and other destructive forces. It can be installed without service interruption. Have peace of mind that your low voltage wiring is protected.

Maximum installation depth: Maximum protection depth:
EXTERIOR UTILITY GUARD
Designed to protect the vulnerable point where utility wires enter a building.
Minimizes the potential for damage to low voltage utility wires.
